

R4+ NHS Wales Care Package Code Lookup

This 10-page job aid is intended for all team members and provides convenient lookup tables to help practices that are adjusting to the new NHS Wales Care Package model determine the specific Care Package type that is produced based on the treatment codes that are charted.

The following tables are sorted by Care Package type and each lists the treatment codes that result in the associated Care Package and the subsequent charges.

Note:

- If you create a course of treatment and mark it as Urgent treatment, then any codes that are charted will be classified as an Urgent Care Package.
- Future enhancements to the R4+ software are planned to group the course treatments to the Care Package when charting so that you can easily see at a glance which Care Package will be produced.
- Recall Assessments and Patient New Examinations are not allowed to take place in the same Course of Treatment as Stabilisation Care Packages. In cases where one or more is necessary, you must create a Separate Course for the additional Care Package, as the Payment Reform Regulations expect Stabilisation to be carried out before any other care is provided.
